RADIATION LICENSE REQUIREMENT

The Administrative Rule on Radiation Control, Chapter 11-45, requires a **Radiation Facility License** for all facilities with ionizing radiation-producing machines or radioactive materials (not licensed by the U.S. Nuclear Regulatory Commission) **before** installation, possession, or use of such radiation sources. Radiation facilities must ensure services are provided by properly licensed service entities before services are rendered.

A **Radiation Services License** is required for all entities, which sell, lease, install, or service equipment, provide radiation services for radioactive materials, or provide health physics services or medical services **before** such services are rendered to radiation facilities. Radiation service entities must ensure radiation facilities are properly licensed before services are rendered.

A completed **Application for Radiation Facility/Service License** with the appropriate fee should be submitted sixty days before intended possession of sources of radiation or provision of radiation services.

If you require an application or additional information, please contact our office at (808) 586-4700.
